Assistant Executive Director

FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

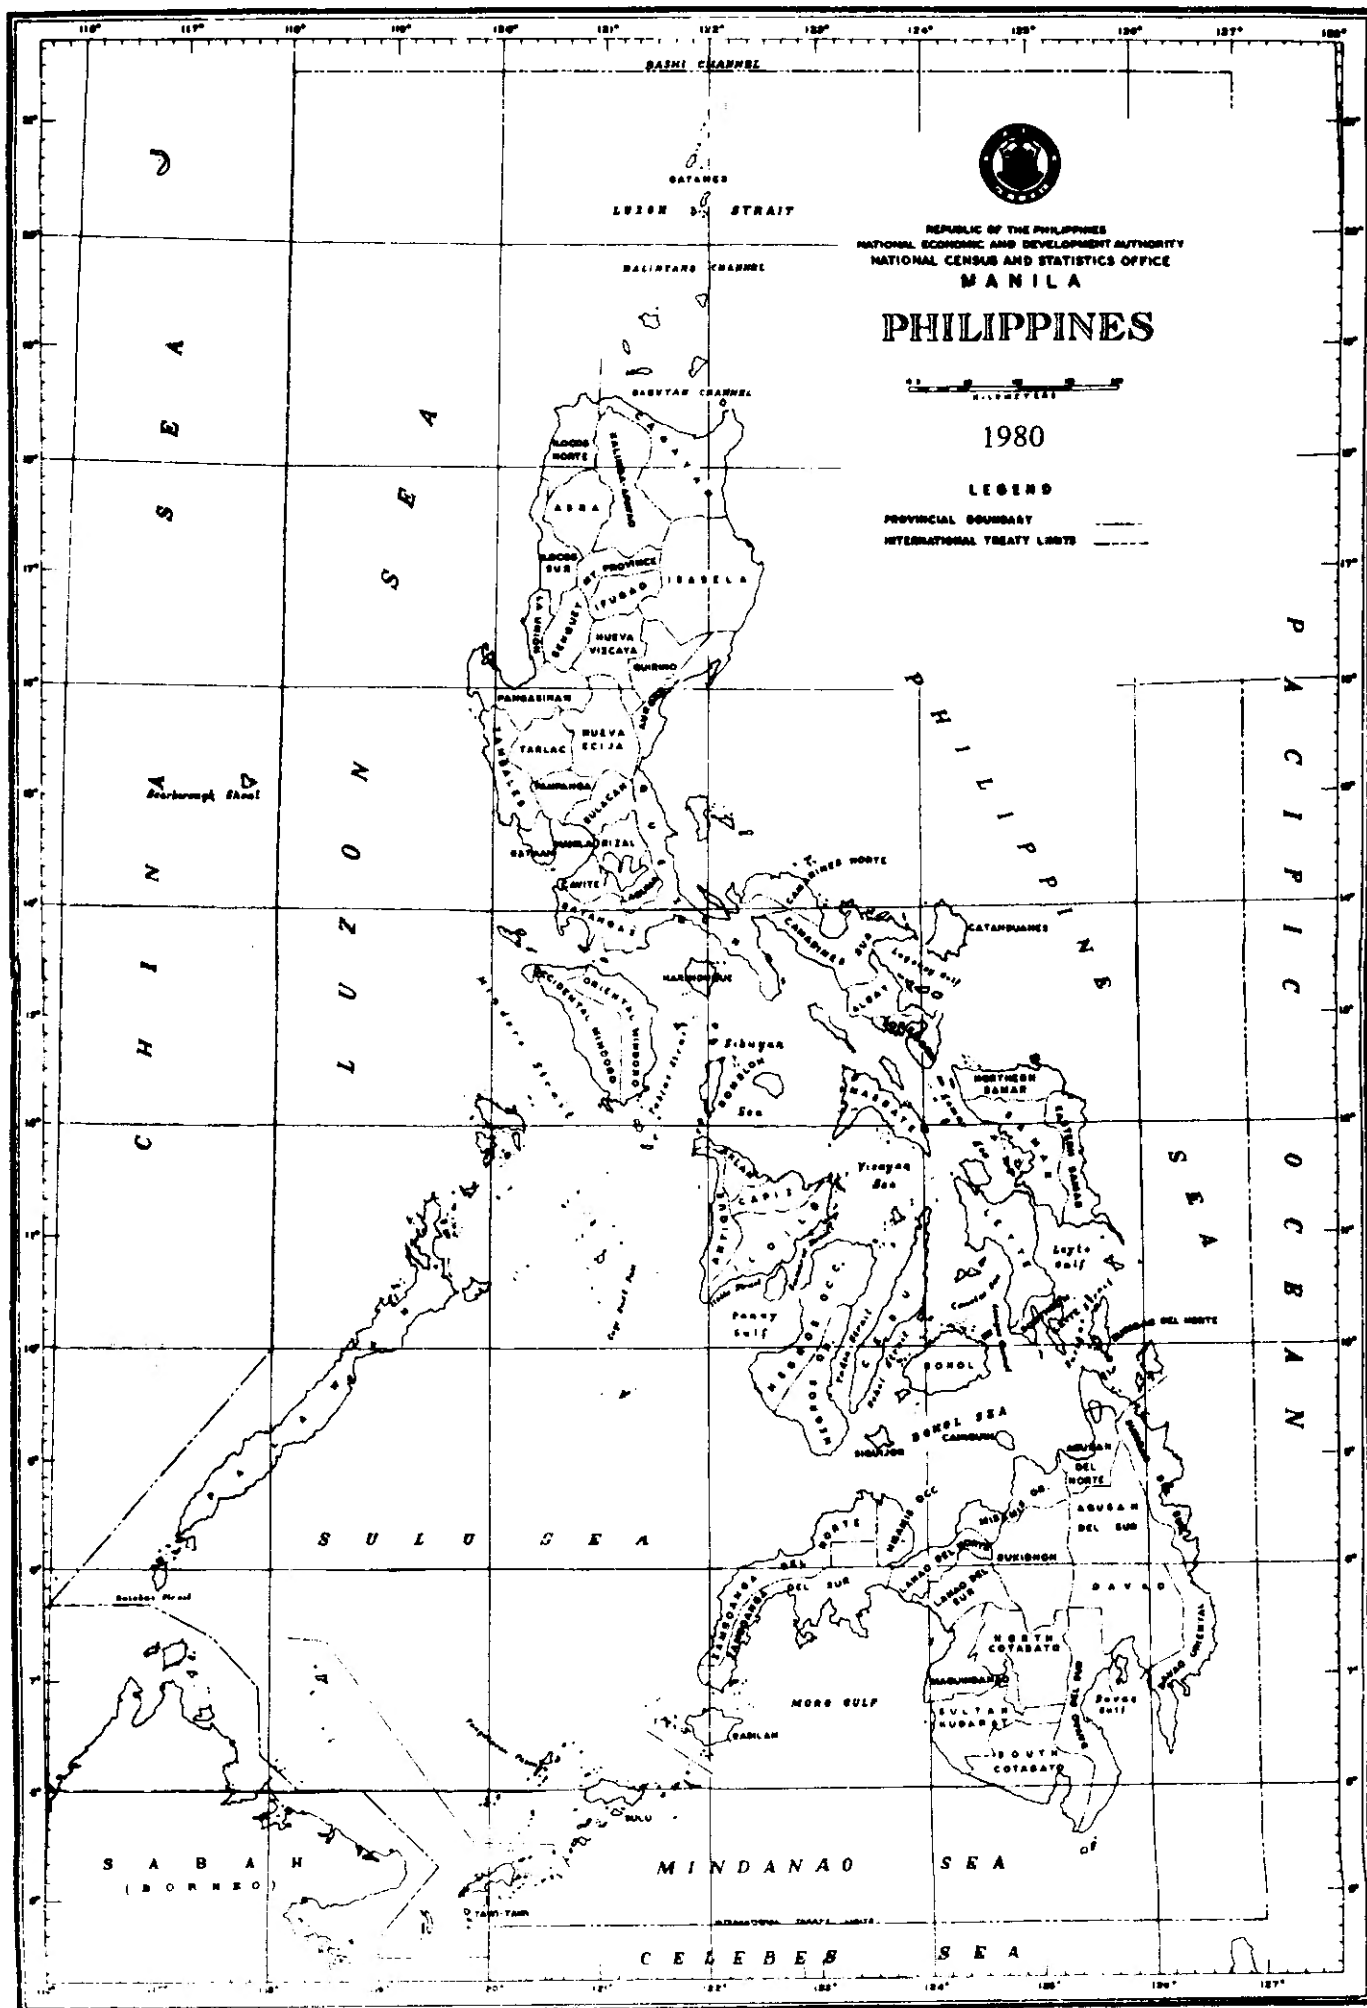

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Manila, Philippines
May 1983

Explanatory Text

GENERAL

INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

AUTHORITY FOR THE 1980 CENSUS

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every census year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

EXPLANATORY TEXT

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

EXPLANATORY TEXT

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

CENSUS ORGANIZATION

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

EXPLANATORY TEXT

POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer Walls
Highest Grade Completed	Year Built
Literacy	Floor Area of Dwelling Unit
Language/Dialect Spoken in the Household	Tenure of Owner-Occupant with Respect to the Land
Gainful and Non-Gainful Occupation	Kind of Lighting Facilities
Major and Minor Industry	Use and Source of Water Supply
Migration	Type of Toilet Facilities
	Kind of Cooking Fuel
	Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

DEFINITION OF TERMS AND CONCEPTS

I – POPULATION

BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

EXPLANATORY TEXT

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - 1) A town hall, church or chapel with religious services at least once a month;
 - 2) A public plaza, park or cemetery;
 - 3) A market place or building where trading activities are carried on at least once a week;
 - 4) A public building like a school, hospital, puericulture and health center or library.
4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
 - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

EXPLANATORY TEXT

- or within one year, if abroad;
 - b. students who usually go home to their respective households at least once a week;
 - c. persons working elsewhere who usually go home to their respective households at least once a week;
 - d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions; (2) in mental hospitals; (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
 - e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
 - f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
 - g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
 7. Persons found in the household who have no usual place of residence elsewhere;
 8. Persons found in the household who are not certain of being enumerated elsewhere;
 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

EXPLANATORY TEXT

PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival;
6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a *balikbayan* who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
7. Citizens of foreign countries in refugee camps/vessels; and
8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

EXPLANATORY TEXT

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

HEAD OF HOUSEHOLD

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

1. Spouse — a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
2. Son/daughter — the head's own child, stepchild, or adopted child.

EXPLANATORY TEXT

3. Son-in-law/daughter-in-law — refers to a household member related to the head by marriage to his daughter or son.
4. Grandson/granddaughter — child of the son or daughter of the head.
5. Other relative — a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
6. Others — any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single — If never been married.
- b. Married — Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed — A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated — If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced — If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown — If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

EXPLANATORY TEXT

HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

USUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

INDUSTRY

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

II – HOUSING

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

EXPLANATORY TEXT

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

1. **Single house** – a complete structure intended for one household. It includes the so-called “nipa hut” or a small house that is built as a more or less permanent dwelling unit.
2. **Duplex** – a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
3. **Apartment/accesoria/condominium/row house**

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

4. **Improvised (barong-barong)** – a makeshift or roughly constructed house usually built with salvaged materials.
5. **Commercial/industrial/agricultural** – buildings not intended for human habitation but used as dwelling units at the time of the census.

Commercial – a building used for transacting business or rendering professional services, such as a storage or an office building.

Industrial – a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.

Agricultural – any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.

6. **Other housing unit (natural shelter, boat, etc.)**

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

7. **Hotel, lodging house, dormitory, etc.** – This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
8. **Institutional (hospital/convent/school dormitory/penal institution, etc.)** – a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
9. **Other collective living quarters** – any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

EXPLANATORY TEXT

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Asbestos
4. Cogon/nipa
5. Makeshift/salvaged materials
6. Others (anahaw, etc.)

CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Wood/plywood
4. Mixed tile/concrete/brick/stone and wood/plywood
5. Asbestos
6. Bamboo/sawali
7. Cogon/nipa
8. Makeshift/salvaged materials
9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

NUMBER OF ROOMS IN THE DWELLING UNIT

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

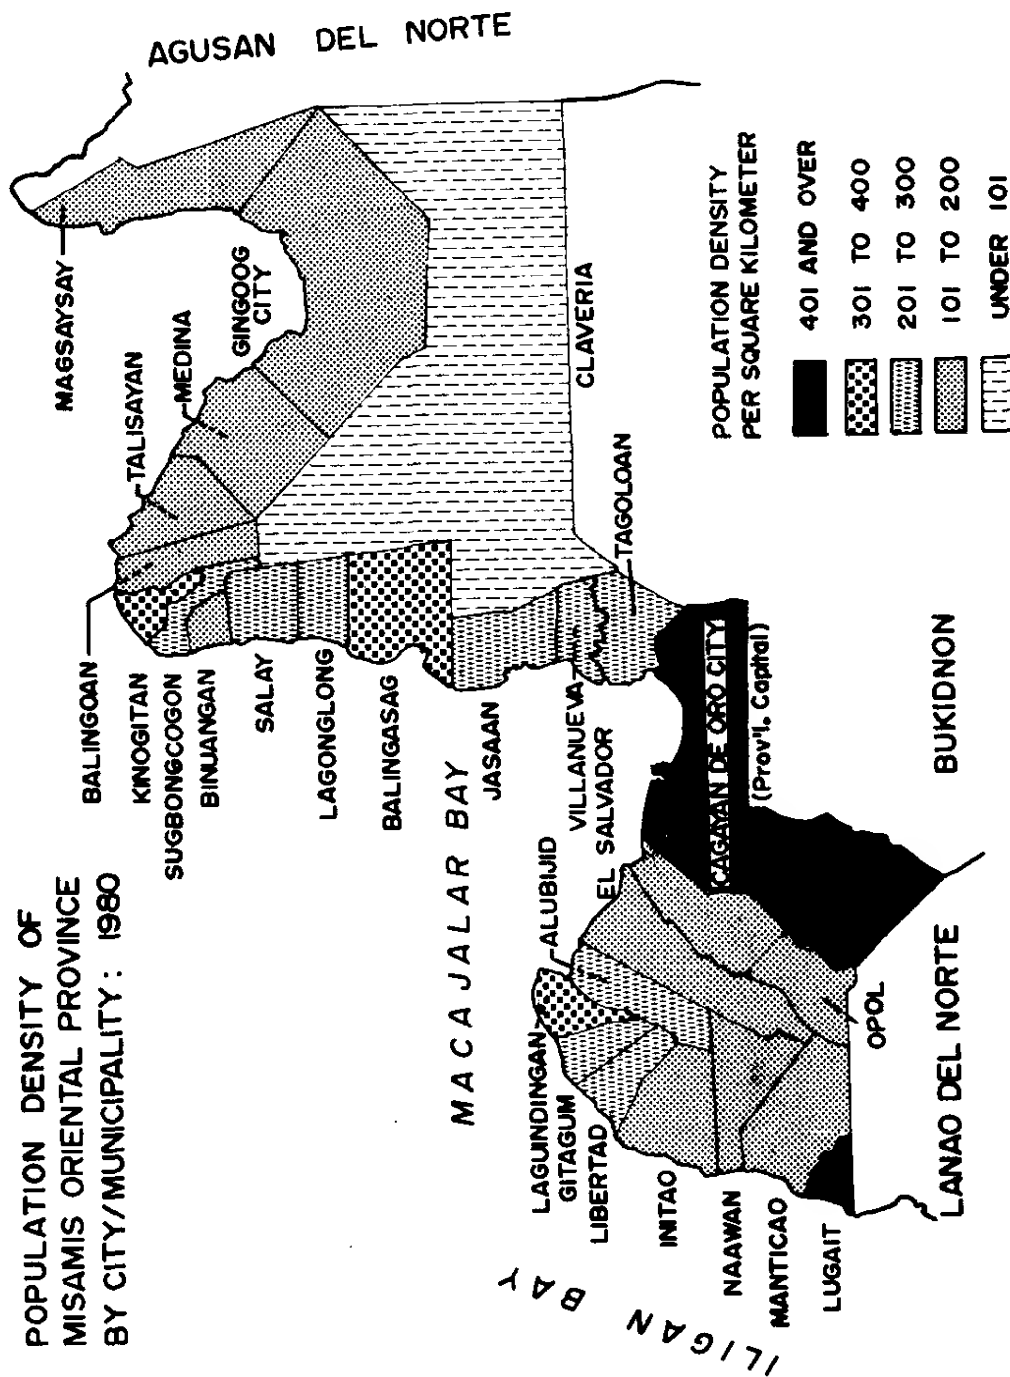

EXPLANATORY TEXT

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

POPULATION DENSITY OF
MISAMIS ORIENTAL PROVINCE
BY CITY/MUNICIPALITY: 1980

A BRIEF ANALYSIS

Below are comparative figures showing the age composition of the population from 1970 to 1980:

**TABLE B – AGE COMPOSITION OF THE POPULATION,
MISAMIS ORIENTAL: 1970, 1975 AND 1980**

Age Composition	1980		1975		1970	
	Number	Percent	Number	Percent	Number	Percent
Total	<u>690,032</u>	<u>100.00</u>	<u>560,490</u>	<u>100.00</u>	<u>472,756</u>	<u>100.00</u>
0 – 14 years	291,826	42.29	257,384	45.92	226,670	47.95
15 – 64 years	379,836	55.05	291,072	51.93	236,009	49.92
65 years and over	18,370	2.66	12,034	2.15	10,077	2.13

A BRIEF ANALYSIS

The median age of the population in 1980 is 17 years; half of the population are below 17 years old and the other half, above this age. In 1975, the median age of the population was recorded at 16 years, implying that the population was getting older.

The dependency ratio (number of dependents for every 100 persons in the productive age group) was registered at 81.67. Dependency ratio in rural areas was 87.49, markedly higher than the urban ratio of 73.16. Of the total urban population, 39.84 percent are below 15 years old; 57.75 percent belong to the productive age bracket and 2.41 percent, 65 years and above. Comparatively, 43.84 percent of the rural inhabitants are 0-14 years old; 53.34 percent, 15-64 years and 2.82 percent, 65 years and over (Table 3).

MARITAL STATUS

More than fifty percent (50.30%) of the total population 10 years old and over are married followed by the never married with 46.11 percent. The rest are either widowed (3.08%) or divorced/separated (0.45%). Only 0.06 percent did not bare their marital status. In 1975, the most numerous group was comprised of never married persons (50.12%) while married persons made up 46.70 percent.

**TABLE C – POPULATION 10 YEARS OLD AND OVER
BY SEX AND MARITAL STATUS, MISAMIS ORIENTAL:
1970, 1975 AND 1980**

Sex and Marital Status	1980		1975		1970

Divorced/separated	1,447	0.60	752	0.40	719	0.46
Not stated	163	0.07	57	0.03	270	0.17

A BRIEF ANALYSIS

Almost fifty percent (48.82%) of the urban population remained married, the most numerous among the five categories. Never married individuals followed closely with 47.83 percent and the widowed, 2.80 percent. Only 0.48 percent comprised the divorced or separated while barely 0.07 percent did not disclose their marital status. Likewise, married persons were also numerous among the rural inhabitants (51.27%) 10 years old and over. Single persons stood next in rank with 44.99 percent. The widowed registered its proportion at 3.25 percent; only 0.43 percent comprised the divorced or separated and the remaining 0.06 percent are those who did not state their marital status.

Table C presents the population 10 years old and over by sex and marital status in 1970, 1975 and 1980.

A BRIEF ANALYSIS

HIGHEST GRADE COMPLETED

Of the 538,221 persons 7 years old and over, 54.92 percent or 295,574 were able to reach elementary level. This figure signified an increase of 30,596 or 11.55 percent from the total elementary schoolers in five years. Over one-fourth of the total population (26.04%) did not go beyond high school, greater by 4.40 percentage points over the proportion for 1975. Those who had college training made up only 8.50 percent, an increase of 2.96 percentage points over the 1975 proportion, while those who were academic degree holders composed of 4.37 percent, or an increase of 1.15 percentage points over that in 1975. The

A BRIEF ANALYSIS

proportion of those who did not have any formal education and those who did not disclose their educational attainment had decreased by 1.05 and 0.98 percentage points, respectively.

Among those who had elementary training, only a third (33.79%) graduated from the sixth or seventh grade. Nearly thirty-five percent (34.26%) did not go beyond the first to third grade; 17.90 percent attained fourth grade and 14.05 percent, fifth grade. Of those who had secondary education, 67.28 percent reached at most the third year while the rest (32.72%) graduated from fourth year. Almost eighty percent of the college undergraduates (79.04%) finished the lower collegiate years (first to third years) while 20.96 percent completed fourth year or higher (Table 5).

The distribution of the private household population according to highest grade completed in two censal years is shown in the corresponding table:

**TABLE D – PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER
BY HIGHEST GRADE COMPLETED, MISAMIS ORIENTAL:
1975 AND 1980**

Highest Grade Completed	1980		1975	
	Number	Percent	Number	Percent
Total	<u>538,221</u>	<u>100.00</u>	<u>431,566</u>	<u>100.00</u>
No grade completed	31,893	5.93	30,114	6.98
Elementary	295,574	54.92	264,978	61.40
High school	140,154	26.04	93,372	21.64
College	45,751	8.50	23,920	5.54
Academic degree holder	23,544	4.37	13,919	3.22
Not stated	1,305	0.24	5,263	1.22

LITERACY

Misamis Oriental had a high literacy rate with 88.15 percent of the private household population aged 10 and over, able to read and write. This figure indicated an increase of 2.30 percentage points over a decade. Of the literates, 49.83 percent were males and 50.17 percent were females. Inhabitants in the urban areas were found to have a markedly higher literacy rate (95.20%) than their rural counterparts who comprised 83.59 percent. The literacy rate for both sexes was almost the same in the urban areas (95.12% for males and 95.28% for females). A different pattern was observed in the rural areas where 83.03 percent of the males and 84.18 percent of the females were literate (Table 6).

A BRIEF ANALYSIS

**FIG. 4 – PERCENTAGE LITERACY OF PRIVATE HOUSEHOLD POPULATION
10 YEARS OLD AND OVER BY SEX, URBAN-RURAL,
MISAMIS ORIENTAL: 1980**

LANGUAGE OR DIALECT

Misamis Oriental is composed mostly of Cebuano-speaking inhabitants. The 1980 census showed that 96.45 percent of the total private households in the province reported Cebuano as their most predominantly spoken dialect; 1.42 percent speak Cagayan de Oro; 0.66 percent, Tagalog; 0.28 percent, Hiligaynon (Ilongo) and 0.24 percent, Lineyte-Samarnon (Waray). Only 0.95 percent of the total private households speak some other dialects (Table 7).

A BRIEF ANALYSIS

largest industry group, employ 18.45 percent of the gainful workers whose three principal concerns are in personal and household services (44.99%), public administration and defense (22.79%), and education services (18.87%). Wholesale and retail trade ranks third with 8.03 percent – retail trade being the contributor of 90.00 percent of employment. Manufacturing contributes 8.00 percent, in which the manufacture of food, beverages and tobacco is its main concern (45.96%). Transportation, storage and communication employs 5.30 percent of the total gainful workers; construction, 3.69 percent; financing, insurance, real estate and business services, 2.50 percent and electricity, gas and water, 0.50 percent. While mining and quarrying share only 0.18 percent of the gainful working force, activities not adequately defined account for 2.29 percent (Table 9).

FIG. 6 – GAINFUL WORKERS 15 YEARS OLD AND OVER
BY MAJOR INDUSTRY GROUP, MISAMIS ORIENTAL: 1980

A BRIEF ANALYSIS

MIGRATION

Out of the 576,710 private household population 5 years old and over, 89.12 percent are residents of the same municipality on May 1, 1975 and on May 1, 1980. Of the 62,767 individuals or 10.88 percent who had a different place of residence in 1975, 39.21 percent moved to another city or municipality within their home province, while 59.86 percent moved outside provincial boundaries. Only 0.93 percent of the migrants were residing in foreign countries. In the first two migratory movements, there were more females than males — larger by about 0.22 percentage point in the inter-municipality migration within the province and by 0.21 percentage point among migrants from other provinces. Among residents of foreign lands, however, the male proportion was higher by 0.02 percentage point over its female counterpart.

TYPE OF BUILDING

Of the 119,519 total number of households in Misamis Oriental, a great majority (92.84%) of households occupy single houses. Some live in duplex (3.47%), apartment/accesoria/condominium/row house/etc. (2.10%), improvised structures such as barong-barong (0.93%) and commercial/industrial/agricultural buildings (0.56%). Only 0.05 percent are occupying other housing units like natural shelter, boat, etc. while barely 0.03 percent live in hotel, lodging house, dormitory, etc. The remaining 0.02 percent live in other

**TABLE F — NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS
BY TYPE OF BUILDING, MISAMIS ORIENTAL: 1970 AND 1980**

Type of Building	1980		1970	
	Number	Percent	Number	Percent
Total	<u>119,519</u>	<u>100.00</u>	<u>76,088</u>	<u>100.00</u>
Single house	110,966	92.84	68,329	89.80
Duplex	4,153	3.47	1,786	2.35
Apartment/accesoria/con- dominium/row house/etc.	2,505	2.10	1,807	2.37
Improvised (barong-barong)	1,112	0.93	3,182	4.18
Commercial/industrial/agri- cultural	667	0.56	971	1.28
Other housing unit: natural shelter, boat, etc.	61	0.05	—	—
Hotel, lodging house, dormi- tory, etc.	30	0.03	—	—
Institutional (hospital, convent, school dormitory, etc.)	5	0.00	13	0.02
Other collective living quarters (military camp, etc.)	20	0.02	—	—

A BRIEF ANALYSIS

collective living quarters like military camp, etc.

Among urban households, 85.45 percent were found occupying single houses, lesser by 12.05 percentage points over the proportion of single house occupants in the rural areas (97.50%). However, the proportions of occupants in duplex and apartment/accessoria/condominium/row house in the rural areas are far behind by 5.65 and 5.00 percentage points, respectively, than those in the urban areas.

Households occupying single houses nearly doubled the total number recorded in 1970 — 110,966 against 68,329. Those in duplex type increased by more than a hundred percent (4.153) over the 1970 figure of 1,786. The same trend was true with apartment/accessoria/condominium/row house, etc., which increased from 1,807 households in 1970 to 2,505 in 1980. These improvements in the occupancy of the three types of buildings resulted to the decrease in the proportion of households living in improvised structures like barong-barong (from 4.18% to only 0.93%).

TYPE OF OCCUPANCY

Table 1 also shows that 80.36 percent of the total households are owners of the dwelling units they occupy. The rest of the households are either tenants/lessees (11.15%), subtenants/sublessees (0.41%), or rent-free occupants (8.08%).

In the rural areas, owner-occupants of dwelling units are more common (89.57%) than in the urban areas (65.77%). However, tenants/lessees are far more numerous in the urban (22.03%) than in the rural areas (4.28%). The same is true with the remaining two types of occupants; subtenants/sublessees in the urban areas constitute 0.75 percent while those in the rural areas make up only 0.19 percent and free-renters, 11.45 percent for urban and 5.96 percent for rural dwellers.

CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Majority of the households in Misamis Oriental are living in dwelling units constructed with roofs of light materials such as cogon/nipa, bamboo/sawali, makeshift/salvaged materials and other like anahaw (54.21%). The remaining 45.79 percent have roofs of strong materials such as galvanized iron/aluminum, tile/concrete/brick/stone and asbestos. In the urban areas, however, households in dwelling units roofed with strong materials are more common (58.48%) than those in units with roofs of light materials (41.52%). As expected, majority (62.21%) among rural households have their dwelling units built with roofs of light materials. More than a third (37.79%) have roofs made with strong materials.

By type of construction materials of outer walls, 79.69 percent of the households occupy their dwelling units built with walls of strong materials (galvanized iron/aluminum, tile/concrete/brick/stone, wood/plywood, mixed tile/concrete/brick/stone and wood/plywood, and asbestos) while only a few (20.31%) have walls of light materials (bamboo/sawali, cogon/nipa, makeshift/salvaged materials and others like anahaw). In the urban areas, nearly all (91.82%) of the households have their walls built with strong materials; only 8.18 percent use light materials for outer walls. The proportion of rural households in dwelling units walled with strong materials is greater (72.04%) than those with light materials (27.96). (See Table 2.)

YEAR BUILT

Nearly fifty percent (48.72%) of the total number of households occupy dwelling units built during 1976-1980; almost one-fourth (24.50%), between 1971 and 1975; 17.14 per-

A BRIEF ANALYSIS

cent, in 1961-1970 and 6.41 percent, from 1951-1960. While dwelling units built from 1942 to 1950 comprise 2.11 percent, only 1.12 percent were erected in 1941 or even earlier.

FLOOR AREA OF DWELLING UNIT

Of the 119,519 total number of households in Misamis Oriental, 48.13 percent occupy dwelling units with floor area of less than 30 square meters. Almost one-third (29.88%) live in 30-49 square-meter units; 8.74 percent dwell in units with 50-69 square-meter floor area and 5.96 percent, in 70-99 square-meter units. Less than a tenth of the total households (7.29%) occupy spacious dwelling units with floor area of 100 square meters and above.

TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Majority (59.87%) of the 96,050 households who own the dwelling units they occupy also own the land where their abodes are erected. Some of the households in Misamis Oriental are either lessees/sublessees (14.64%) or farm lessees/agricultural tenants of land-owners (8.83%). Few households or 5.93 percent have other legal tenure and more than a tenth (10.73%) have no tenure at all like squatters, etc.

SOURCE AND USE OF WATER SUPPLY

Most of the households in the province depend mainly on the faucet, community water system than on any other source of water supply, whether for drinking (49.45%), for kitchen use (47.05%) or for laundry use (36.37%). A considerable number of households utilize tubed/piped deep well for drinking (13.84%), for cooking (13.38%), as well as for washing clothes (8.53%). The high rate of users from these two sources are attributed to the improvement in the waterworks system initiated by the provincial government. Despite this project, however, 23.51 percent of the households still depend on spring for drinking; 22.95 percent for cooking and 18.77 percent for washing clothes. Nearly one-tenth (9.28%) use dug well and 2.86 percent, tubed/piped shallow well for drinking purposes. Only 0.13 percent use rain water for drinking while 0.93 percent depend on lake, river, stream, etc. Approximately 11.42 percent utilize dug well for kitchen use and 3.46 percent, tubed/piped shallow well. Barely 0.20 percent make use of rain and 1.54 percent, lake, river, stream etc. for their kitchen needs. More than a tenth (10.58%) of the total households rely on the dug well for washing clothes; 2.06 percent make use of tubed/piped shallow well and only 0.15 percent launder with rain water. Almost one-fourth (23.54%) reported lake, river, stream or irrigation as their main source for laundering clothes.

KIND OF LIGHTING FACILITIES

Kerosene is predominantly used for lighting by majority (61.58%) of the households in Misamis Oriental. However, through the rural electrification program, more than one-third (35.08%) of the households use electricity for lighting. While 2.97 percent make use of liquefied petroleum gas, 0.13 percent resort to using oil. Only 0.24 percent use other kinds of lighting facilities like wax, candle, etc. A more satisfactory result of the electrification program is observed among urban households with 60.39 percent using electricity for lighting. Users of kerosene comprise 36.14 percent of the urban households, while only 2.96 percent use liquefied petroleum gas. Merely 0.24 percent resort to oil and 0.27 percent other kinds. Among the rural households, more than three-fourths (77.61%) use kerosene;

A BRIEF ANALYSIS

19.13 percent are electricity users and 2.98 percent, liquefied petroleum gas. Barely 0.06 percent use oil while 0.22 percent use other kinds (Table 5).

COOKING FUEL

Wood or charcoal is still predominantly used for cooking by Misamis Oriental residents. Majority or 83.41 percent of the total households are reported using wood or charcoal for cooking while some use either kerosene (6.68%), liquefied petroleum gas (5.25%) or electricity (3.77%). A small percentage (0.89%) of the households utilize other kinds of cooking fuel. Among urban households, wood or charcoal is the most commonly used (71.04%), but its use is more pronounced in the rural areas (91.22%). However, users of electricity in the urban areas (8.05%) are greater than their rural counterparts (1.07%). Liquefied petroleum gas users comprise 11.65 percent of urban households while among rural households, only 1.21 percent report using the same kind. Furthermore, 8.80 percent in the urban areas use kerosene against 5.34 percent in the rural areas. Only 0.46 percent and 1.16 percent of households in the urban and rural areas, respectively, use other kinds of cooking fuel.

TOILET FACILITIES

The proportions of households using the water-sealed with sewer/septic tank (24.38%), water-sealed with other depository (24.34%) and the closed pit such as antipolo, etc. (24.25%) types of toilet facilities are almost equal. While the open pit is being used by 11.68 percent, only 0.68 percent use other types like the pail system, etc. A large proportion of households (14.67%) reported not having any toilet facility. Among the urban households, water-sealed with sewer/septic tank type is used by 46.79 percent, while 28.38 percent use water-sealed with other depository. Only 14.18 percent and 5.63 percent, respectively, are users of closed pit and open pit types. While 0.44 percent use other types (pail system, etc.), 4.58 percent of the urban households do not have any toilet facility. In the rural areas, the predominant use of the closed pit type (30.60%) is observed. Households utilizing water-sealed with other depository double the proportion of water-sealed with sewer/septic tank users (21.80% against 10.25%). Those using open pit toilets comprise 15.49 percent while users of other types comprise only 0.82 percent. Rural households without toilet facilities comprise 21.04 percent.

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

Nearly three-fourths (70.36%) of the total households in Misamis Oriental are reported to have radios; 9.63 percent own television sets and 12.92 percent possess refrigerators or freezers. Among the urban households, 74.54 percent own radios; 20.48 percent have television sets and 26.09 percent, refrigerators or freezers. Over two-thirds (67.73%) of the rural households own radios while television set owners are scarce at 2.79 percent. Only 4.61 percent possess refrigerators or freezers among the rural households (Table 9).

CERTIFICATION

I HEREBY CERTIFY that the data set forth in this form were personally obtained by me in accordance with the rules and regulations promulgated by the National Census and Statistics Office.

Name of person accomplishing this form
(Printed Name & Sign)

Title _____ Date _____ 1980

PERSONS TO BE ENUMERATED AS MEMBERS OF COLLECTIVE HOUSEHOLDS

1. HOTELS, LODGING HOUSES, DORMITORIES, ETC.

- a. Proprietor, manager and employees living in the establishment, except those living therein with their own families and those who usually go home to their respective families at least once a week.
- b. Permanent lodgers/boarders (those who have stayed or expect to stay for one year or longer) and those temporary lodgers/boarders who have stayed for six months or longer as of May 1, 1980 or have been away from their own families for the same period. However, exclude those who usually go home at least once a week.
- c. Lodgers/boarders who are not residents of the Philippines and who have been in the Philippines for one year or longer as of May 1, 1980, or expect to stay in the Philippines for one year or longer. However, exclude those who have temporary place of residence elsewhere in the Philippines to where they usually go home. Exclude also diplomatic representatives or UN, ILO or USAID officials who, like diplomatic representatives, are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families.

2. HOSPITALS AND NURSES' HOMES

- a. All patients, including those just confined, in mental hospitals, leprosaria or leper colonies, pavilions of tuberculosis sanatoria where patients stay more or less permanently, and rehabilitation centers for drug addicts.
- b. Patients who have been confined for six months or longer as of May 1, 1980 in other kinds of hospitals and in wards for temporary confinement in tuberculosis sanatoria.
- c. Nurses in nurses' homes who do not usually go home at least once a week.
- d. Staff members and employees living in hospitals/nurses' homes, except those living therein with their families and those who usually go home at least once a week.

3. WELFARE INSTITUTIONS (Homes for the Aged and Infirm, Orphanage, Boys' Town, etc.)

- a. All inmates or wards, including those just confined.
- b. Staff members and employees living in the institutions, except those living therein with their families and those who usually go home at least once a week.

4. CORRECTIVE AND PENAL INSTITUTIONS

- a. All prisoners in national prisons and reformatories (welfareville).
- b. Prisoners and detainees in provincial or city/municipal jails who have been continuously confined for six months or longer, including confinement elsewhere, as of May 1, 1980, or those whose sentence is for six months or longer even if the sentence is on appeal.
- c. Staff members and employees living in the institutions except those living therein with their own families and those who usually go home at least once a week.

5. CONVENTS, NUNNERIES, SEMINARIES, AND BOARDING SCHOOLS

- a. Monks, priests, ministers, nuns, seminarians etc. However, priests or ministers of sects other than the Roman Catholic Church who live in the convent or house close to church or chapel with their own families are to be excluded (private households).
- b. Students in boarding schools (schools where students are required to stay in the school campus).
- c. Staff members, employees and helpers living in the premises, except those living therein with their own families and those who usually go home at least once a week.

6. MILITARY CAMPS AND STATIONS (PC, Army, Air Force and Navy): PMA

- a. Officers and enlisted men/draftees, except those who live in the premises with their own families and those who usually sleep most nights with private households or in hotels, lodging places or dormitories. Include those belonging to the unit in the camp or station who are away on military operation or mission or aboard naval vessels, except those whose families are living in the camp or station (their own families will report them).
- b. PMA cadets and trainees whose training is for six months or longer.
- c. Detainees who have been continuously confined for six months or longer, including confinement elsewhere, as of May 1, 1980.
- d. Civilian employees living in the camp or station, except those living therein with their own families and those who usually go home at least once a week.

7. LOGGING, MINING AND CONSTRUCTION/PUBLIC WORKS CAMPS: PLANTATIONS AND AGRICULTURAL/FISHERIES EXPERIMENTAL OR BREEDING STATIONS, ETC.

- a. Proprietor, manager, contractor and employees who do not live with their families in the premises and are supplied lodging (beddings, etc.) and/or meals by the company, firm, contractor or agency, except those who usually go home at least once a week.

8. OCEAN-GOING AND INTERISLAND/COASTAL VESSELS OR DEEP-SEA FISHING VESSELS

- a. Filipino crew members of ocean-going vessels (whose own families live in the Philippines) at port as of 12:01 A.M. May 1, 1980, except those who usually go home to their own families in the Philippines at least once every six months.
- b. Any crew member of interisland/coastal vessel or deep-sea fishing vessel at port on any day during the enumeration, if the crew member has no home other than the vessel.

9. REFUGEE CAMPS

- a. Filipino citizens working and living inside the camps.
